1. IMPORTANT SAFEGUARDS

Check voltage to be sure that the voltage indicated on the name plate of Arzum Okka Minio Technical Specifications corresponds with your voltage. Our company shall not be liable for any malfunction that may occur in the event of any discrepancy, therefore any malfunction resulting from discrepancy is out of warranty.

Arzum Okka Minio should only be operated by plugging into a grounded electrical socket connected in accordance with the regulations. Do not use extension cords that supply improper current in order to prevent damage to your machine.

Any repair for this electrical device or its power-supply should be conducted by authorized customer services personnel to avoid danger.

Please contact **Arzum Customer Services** if it needs to be repaired. Our company shall not be liable for any malfunction that may occur due to misuse, therefore any malfunction resulting from misuse is out of warranty.

To protect against electric shock, DO NOT clean and immerse machine and power cord in water. The machine is

electrically operated, avoid touching the plug with wet hands to protect against electric shock.

This appliance should be used by people who are informed, supervised and instructed to use this appliance in a safe manner and understood the risks. Do not let children to play with the appliance and cord, close adult supervision is required when the appliance is used or cleaned by children.

Attention: Keep children away from all packing materials, these materials have potential danger that can cause death as a result of choke.

This machine is intended to be used in such places like houses and following other places:

- In shops, offices and kitchens for staff in other working places,

- Farmhouses,
- In motels, hotels and other residential type locations,
- In sleeping places and breakfast halls,

Do not use outdoors, always avoid to keep the machine at zero or below zero temperatures.

Use Arzum Okka Minio **ALWAYS** on a hard, flat level surface. Do not place the appliance on the edge of table or countertop, the appliance can fall down. Remember your appliance could be filled with hot coffee.

Do not use Arzum Okka Minio on or near hot surfaces, heat resources, near a flame or fiery steam. (Ex: top of hot oven, heater, stove etc.) Do not let cord hang over edge of table or countertop or to contact other devices.

Do not leave Arzum Okka Minio unaccompanied and unattended during operation.

When using your coffeemaker for the first time, simply put water into coffee pot and operate your appliance then discard the waste water.

Do not start brewing coffee process without putting water into coffee pot. There is water-secure security implementation on your appliance. In case operating without water, the appliance will shut off after a while and will not be rerun until it cools down.

Do not put any material into coffee pot except water, coffee and sugar.

Coffee pot should only be used with this appliance, do not use

with any heater. (Ex: on oven, microwave oven etc.)

Serve your brewed coffee with cup, do not drink from the coffee pot.

To handle/carry the coffee pot always use a carrying handle.

Please, unplug from outlet your appliance when your appliance not in use, before cleaning and allow coffee pot to cool.

Please find detailed information about cleaning the appliance on Cleaning and Maintenance section.

Always unplug Arzum Okka Minio when; the coffeemaker is not in use for a long time and/or a malfunction occurs and/or poses a danger.

While pulling the plug **NEVER** pull at grid cable; always pull the plug itself.

Make sure that you unplug from outlet when cleaning and maintenance application.

ARZUM OKKA MINIO TURKISH COFFEE MACHINE

- 1- 1-4 cups brewing capacity
- 2- Double-sided coffee pot (suitable for right and left-handed use)
- 3- Energy transmission base
- 4- Start button and status light
- 5- Brewing detection sensor
- 6- Turkish coffee teaspoon

7 year service life.

Mains voltage: 220-240V ~ 50/60 Hz

Power: 400-480W

Values labeled on the appliance or declared by printed documents are obtained under laboratory conditions according to relevant standards. These values may change depending on the ambient conditions where product is used.

3. USE OF MACHINE

Wipe off the main body of the appliance before first use. Coffee pot can be rinsed under a tap water. After putting water into the coffee pot at MAX level, operate the machine and discard the waste water and allow the appliance to cool.

Your Arzum Okka Minio Turkish Coffee Machine heats during use, therefore do not touch hot surfaces.

You can only make coffee with your coffeemaker. Do not use any liquids or solution in order to boil or heat.

You can make coffee for 1-4 people with your Arzum Okka Minio Turkish Coffee Machine.

When you plug in your machine, status light will turn white with a beeping sound.

Put enough water into coffee pot by number of people. Use Arzum Okka Minio teaspoon to put exact required quantity of Turkish coffee. Add required quantity of sugar and toss to prevent ball formation. Make sure the mixture does not exceed the max level in the coffee pot.

Once you place your appliance on energy transmission base and press the start button, status light will turn into red and start the brewing process. When brewing process ends, your appliance will give a warning beep and status light will turn into white again.

Never displace the coffee pot during brewing process. In case that you displace the coffee pot while still brewing for any reason and is not placed in 6 minutes, the coffeemaker will stop brewing and the red status light will turn into white.

You can easily take the coffee pot to serve when brewing process is done.

Always clean the coffee pot after each use. You can wash the coffee pot easily under a tap water. Do NOT wash coffee pot in dishwasher. Rinse coffee pot after washing.

4. SUGGESTIONS FOR BREWING STRONG TURKISH COFFEE

Arzum Okka Minio, is a practical appliance designed to prepare Turkish coffee in an ideal consistency by simmering.

In the below table you can find suggested ideal measures for preparing delicious Turkish Coffee.

- Displayed amount is coffee for one person.
- 1 scale is the suggested amount of coffee. Depending on a strong or soft coffee you may use more or less coffee to your taste.
- Use fresh coffee for a delicious and foamy Turkish coffee.

Suggested Scale Of Ingredient For Preparing delicious Turkish Coffee

	WATER	COFFEE	SUGAR
BLACK COFFEE	1 Turkish coffee cup	1 scale Arzum Okka Minio spoon	Without sugar
COFFE WITH LITTLE SUGAR	1 Turkish coffee cup	1 scale Arzum Okka Minio spoon	Half cube sugar/ Half teaspoon powder sugar
COFFEE WITH MEDIUM SUGAR	1 Turkish coffee cup	1 scale Arzum Okka Minio spoon	1 piece of cube sugar/ 1 teaspoon of powder sugar
SWEET COFFEE	1 Turkish coffee cup	1 scale Arzum Okka Minio spoon	2 pieces of cube sugar/ 2 teaspoons of powder sugar

Brewing:

1. Insert the plug. Your appliance will turn on automatically and status light will turn into white.
2. According to the above suggested scales, firstly add coffee then sugar and then water to the cooking coffee pot. Slightly mix with a spoon (Figure-1)

Note: For a delicious coffee, make sure the interior of coffee pot is clean.

3. Your appliance can make coffee up to 4 persons at a time. As your cup sizes may vary, pay attention not to exceed water-coffee-sugar mixture beyond the MAX level line in the coffee pot. Otherwise coffee may not brew well and/or boil over the coffee pot. (Figure-2)

4. Place the coffee pot to the appliance. (Figure-3)

Note: If you do not place the cooking coffee pot to its spot correctly your appliance will not start brewing.

5. Press the start button located on the front panel. (Figure-4)

6. Appliance will give a warning sound (beep) to start and the status light around start button will turn into red. (Figure-5)

7. Brewing duration;

AMOUT	COOKING DURATION
1 PERSON	1-1.5 MIN
2 PERSON	2-3 MIN
3 PERSON	3-4 MIN
4 PERSON	4-5 MIN

Note: Duration of brewing may vary depending on ambient temperature, water temperature and mains voltage. On subsequent brewing process, the duration may shorten as the appliance will be hotter.

8. After brewing process has finished, your appliance will give warning beep and the red status light turns into white and goes into sleep mode. You may completely turn off your appliance by plugging out.

9. After cooking you can serve your coffee by pouring into the cup.

Note: In order to prevent the residue of foam and coffee grounds in the coffee pot, shake the coffee pot slightly and then pour. (Figure-7)

10. If you wish to cancel the brewing process for any reason, just press the start button.

5. CLEANING AND MAINTENANCE

Before cleaning, unplug the appliance and wait for coffee pot to cool down.

Wash the coffee pot under a tap water by removing from the appliance, and dry out the bottom, exterior and sides with a dry fabric.

Dry out the main body as well as the exterior side of coffee pot where the energy transmission base is located only with dry fabric, **NEVER** plunge it into water or wash in the dishwasher.

Do not clean any of the appliance accessories with harsh and chemical cleaners (bleach, hydrochloric acid, etc.) except the cleaners used for this type of devices. Do not use abrasive cleaners, metal objects, hard sponges, wire brushes or harsh cleaners to clean the appliance.

Wipe the cooking sensor with a wet fabric after each use. (Figure-8)

Removing Calcification

Lime inside the water used in time may pile up inside the coffee pot and thus may reduce the performance of your appliance.

You can clean your appliance's coffee pot with a decalcifying product specific to electrical kitchen appliances or you may try environmental friendly solutions such as white vinegar.

In order to clean your appliance's coffee pot with white vinegar; pour enough white vinegar to cover the base of your appliance's dec

6. HANDLING AND SHIPMENT

During handling and shipment, your appliance must be kept in original package in order to prevent damages to its parts.

Keep at normal position during shipment.

Do not drop the product when transporting and protect from impacts.

After delivery of the product, failures and damages that may occur while transporting are not covered by warranty.
